# INTRODUCTION

The Brooks Community Health Center is a vital nonprofit organization that attempts to moderate the negative impacts of apathy and lack of available medical services on the underserved population of Liberia. Our organization's projects, implemented by a well-trained staff, offer many opportunities to impact public health and education, one community at a time and decrease poverty through needed health treatment services and outreach programs. Supporting the development of mind, body, and soul, TBCHC will provide as many individuals as possible with a thorough foundation for future success.

Recognizing the needs that exist among our target population, TBCHC's staff intends to establish a medical clinic and provide educational classes that focus on individual empowerment. Throughout continuation of the proposed activities, our organization will address the needs of our target communities, brighten lives, and assist each participant in achieving their personal goals. The organization's objectives are accomplished by implementation of stimulating activities and materials that are organized around a well-developed prospectus.

Our activities are overseen by a group of well-qualified individuals. Our diverse staff members have ties to the community, and thus possess the unique ability to relate to the target demographic. Additionally, our Board of Directors is comprised of a professional group of talented individuals who are dedicated to committing their time and resources to building a stronger community.

TBCHC strives to serve as many people as possible with the resources we have available – every individual is important to our organization and we will not discriminate against anyone. By offering services that are concentrated on serving those less fortunate and addressing the greatest needs of our target community, we can make a positive contribution in helping the people we work with lead a more fulfilling life.

*TBCHC is seeking the support required to build an outpatient medical facility that will serve at-risk community members of Liberia.*

## OUR SOLUTIONS

Our administrators have developed a comprehensive health care program that will include a vast array of medical treatments and is designed to improve our target demographics' overall well being. The construction of the facility is expected to be completed by 2020.

Our health care programs will be available to the public during standard business hours. We also aspire to recruit health care providers to be available on call twenty four hours for labor and delivery services. All services will be overseen by qualified and licensed medical professionals that have previous experience in the health care industry.

*Our patient services will include, but are not limited to, the following treatments:*

- Family practice and preventive health care services
- Periodic medical exams
- Immunizations for children, adolescents, and adults
- Prenatal care, Women's Health, Labor and Delivery services
- Speech, hearing and ophthalmology services
- HIV and tuberculosis treatment
- Diabetes testing and treatment
- Dental care and Education
- Public health services including educational instruction regarding hygiene/sanitation, nutrition, and family planning
- Independent and Assisted living services

TBCHC will also provide a variety of educational classes for community members to attend. Our representatives will facilitate literacy and vocational skills classes throughout out the week. All classes are available to any child or adult in the area looking to increase their education and current skill level. Participation will be on a first come, first serve basis as venue capacity allows.

Every class will operate throughout the month for several hours at a time. During each session, qualified instructors lead participants through comprehensive lectures and a multitude of hands on exercises. We will also provide a Prometric testing Center to cater to the professional testing needs of members of the community. We firmly believe that our classes provide our clients with the opportunity to obtain meaningful employment, effectively communicate and contribute to the community where they live.
